

Does your lower back hurt?  
**You probably don't  
need an MRI,  
CT scan, or X-ray.**

## **Here's why:**

- They won't help you feel better any faster.
- They have risks, including exposure to radiation.
- They aren't cheap.

**What can you do to feel better? Five easy ideas are on the other side.**

# Most people can get over lower-back pain in a few weeks by trying these steps:

- 1 Stay active and walk.**
- 2 Use heat.**
- 3 Take non-prescription pain relievers like Tylenol®, Advil®, or Aleve®.**
- 4 Sleep on your side or your back, with a pillow between or under your knees.**
- 5 Ask your doctor about acupuncture, massage, yoga, or physical therapy.**

There are still times when you might need an imaging test. Talk to your doctor about your symptoms to find out if you need imaging tests – or if you can wait to see if you just get better with time.
